

KIRK HAMILTON ALLEN FOUNDATION

2012 EHS Graduate

Compassion ♦ Education ♦ Connection ♦ Support

Through our work we wish to share Kirk's story, his inspiration and passion for life. Kirk was a healthy young man, avid sportsman, a true outdoorsman, inspired through soulful music and in turn offered a richness in every connection. Our objective is to keep Kirk's memory reminiscent in making a difference in drug prevention, anxiety disabilities and impacting lives through the tools of education.

Our mission is to speak out against teen suicide, teen marijuana consumption, "Spice" and other Synthetic Drugs being sold legally and to ban all together through legislation. We are dedicated to saving a life of a teen, a family and to restore hope in our community. We are committed to a healthy future generation.

We ask you to act now, to join us in sharing Kirk's story so we may raise up lives to empower a healthy belief system amongst our teens, instill social capital, support families and encourage hope in our communities.

- ♦ Spice or K2 is a chemically sprayed herbal substance sold as a legal, synthetic cannabis, or a drug that mimics the effects of marijuana.
- ♦ The drug residues of Spice remain in your body for a period 2 weeks to 6 months and at times causes irreversible damage without recovery.
- ♦ The effects of marijuana and Spice is damaging to a teen's developing brain. It has hallucinogenic properties, displays paranoid symptoms, displays violently dangerous behavior, extreme anxiety and is often deadly with suicidal results.
- ♦ Today's teens are suffering from high anxiety levels, school pressures, and social detachment in our society.
- ♦ Suicide today amongst our teens is at staggering record levels and presents 4 times the risk since 4 decades. Teens diagnosed with A.D.D. and A.D.H.D are at the greatest risk.
- ♦ Spice and synthetic marijuana is currently legal in the US and has been banned in many countries in Europe, including Germany, France and the U.K.
